Om. No. 13403 III/60 - 1 of 265.00

Famine code Revision Committee
- Recommendation - Re-establishment
of sheep breeding station
at Hagar

The Famine code Revision
committee has recommended,
among other things, that special
attention should be paid to the
needs of the ceded districts
in respect of the wool industry
and that the sheep breeding station
which was removed from the Hagar
area to Hosur some years ago
should be re-established at the
Hagar farm or elsewhere
(copy of the recommendation is
enclosed). The Dir. of Agriculture
has suggested that it is worth while
starting a station in the Bellary Dist
~~in the District of Bellary~~ P. T. D.
in the opinion that the practical help
immediately needed is in the
direction of marketing the bales
that are made with the wool available

The Director of Vety Services is requested to report on the need for starting another station at Hagari or at some other suitable centre.

Station Triplicane P.O., Dated the 12th August 19 40

From (Name) T.J. Hurley Esq., MRCVS., DVSM., IVS., ...

(Designation) Director of Veterinary Services, Madras

To The Secretary to the Government of Madras,

DEVELOPMENT Department.

Sir,

Ref:- Government Memorandum No.13403-III/40-1,
Development, dated 21st May 1940.

A scheme for evolving a woolly breed of sheep by cross-
ing Bellary ewes with Bikaner rams is now being carried on at
the Livestock Research Station, Hosur with financial aid from
the Imperial Council of Agricultural Research and the results
of the experiments are awaited. In the circumstances, I
would suggest that the question of starting a sheep breeding
station in the Ceded Districts for the improvement of local
sheep as recommended by the Famine Code Revision Committee
may be deferred till the results of the present experiments
are definitely known.

4

- 2 -

2. In the meanwhile, the District Veterinary Officer, Bellary will be informed each year, of the number of rams of the Bellary breed which are available for sale for breeding purposes at the Livestock Research Station, Hosur and which are superior from the point of production of wool, so that he can communicate the information to the people in the Bellary District who are interested in sheep breeding.

I have the honour to be,

Sir,

Your most obedient servant,

J. J. H. f. 13/8.
Director of Veterinary
Services, Madras.

Extract of note from the file re: "Hamin
code Revision Committee"

RECOMMENDATION OF THE COMMITTEE.

15. It ought not to be difficult to increase the production of wool in the Ceded districts. Large herds of goats and sheep manage to survive on the scanty pasture obtainable on wastes, the margins of streams, and in the scrub jungle on hill slopes. There are over 2,800 looms engaged in the weaving of cumblies in the districts of Anantapur, Bellary and Kurnool. The crying need of the industry is for improvement in the quality of the wool, and this in its turn depends on the provision of better grazing facilities. We understand that this question is engaging the attention of the Government and we recommend that special attention should be paid to the needs of the Ceded districts. For the same reason we recommend the re-establishment in connexion with the Hagari farm or elsewhere of the sheep-breeding station which was removed to Hosur some years.

BOARD'S REMARKS.

The Committee observed that there are over 2800 looms engaged in the weaving of cumblies in the districts of Anantapur, Bellary and Kurnool, and suggested that the crying need of the industry was for improving the quality which in its turn depended on the provision of better grazing facilities. It therefore recommended the re-establishment in connection with the Hagari farm elsewhere of the sheep breeding station which was removed to Hosur some years ago.

The Director of Agriculture suggests that it is worth while starting a station in Bellary District. He points out that sheep breeding was first started at Hagari, afterwards transferred to Bantanahal and

then to Hosur where it is going on.

The Board observes that the practical help immediately needed is in the direction of marketing the cumblies that are made with the wool available.

DEVELOPMENT DEPARTMENT

Sheep breeding work is now carried on at the Livestock Research Station, Hosur. The Director of Veterinary Services may perhaps be consulted on the need for starting another station at Hagari or at some other suitable centre.

Ref: A.S.'s query on p. 2 above

A sheep breeding scheme sponsored by the D.C.A.R. is being worked in this Proj with effect from 23.10.38. An account of the scheme is given below.

In January 1934 the Govt. of Madras forwarded a scheme on sheep breeding, to the D.C.A.R., but it was not sanctioned for a long time pending allotment of funds by the Council. The Council sanctioned this scheme in May 1938, for a period of five years at a total cost not exceeding

Rs 18,000/-. The entire expenditure is borne by the Council and no provincial contribution is involved in this scheme ^{except the leave and pensionary contribution}. The staff sanctioned for purpose of the scheme is only one upper subordinate in the Madras Agri Sulebe Service and 4 menials (one shepherd at Rs. 12/- p.m. and 3 boys at Rs. 8 each p.m.). The details for the expenditure on the scheme are given on pp. 18-19 of G.O. No. 1972-73 Dev. & 12-8-38.

The scheme was started on 23-10-38 and the first progress report on the working of the scheme up to 31-3-39 is on pages 53-54 of G.O. at (F).

Before its transfer to Kotur, work in sheep breeding (with Bellary flock) was being carried on at Rajari
